

Learn how to crush business complexity with Pega!

At Ai4Academy you can learn new skills and forge an exciting career using the world's leading AI and Intelligent Automation tool – Pega Infinity™.

At Ai4Academy, our trainers are experts with extensive real-life experience in the field implementing Pega technology and we believe this provides us with a unique ability to not only train people in Pega's no/low-code technology, but just as importantly, how then to apply those new skills in their own environment.

Our training services are designed to drive students to achieve their Certified Pega professional qualifications as described in the table below.

But the journey doesn't stop there. At Ai4Academy, we provide ongoing coaching after the formal training and can also offer a career path with our sister Consulting Services company, Ai4Process, for those students that achieve their Certified Pega professional qualifications.

Pega Certified System Architect (CSA)	This is the first step on the career path for those who want to learn how to develop Pega applications
Pega Certified Senior System Architect (CSSA)	This is the next level for developers who want to enhance their Pega skills to the extent they can lead project streams and small scrum teams
Pega Certified Business Architect (CBA)	For those who wish to progress down a Business Analysis route, using Pega technology to translate business requirements into epics and user stories. Includes hands-on Pega skills.
Pega Certified Customer Service Architect (CCSA)	This is a follow-on course that CSAs and CSSAs interested in learning how to develop Pega applications using Pega Customer Service.
Pega Certified Decisioning Consultant (PCDC)	This course is aimed towards those who wish to expand their Decisioning, marketing and real-time 1:1 Customer Engagement skills
Pega Automation Testing	This course is not based on a Pega course, but is still an essential piece of the end-to-end

	delivery for testing professionals keen to introduce automated testing to improve efficiency, speed and time to market. Based on the Ai4 ATF (Automated Testing Framework).
Pega AI & ML	Designed for those interested in leveraging Pega's extensive Artificial Intelligence and Machine Learning capabilities within their applications.
Pega Certified Robotics System Architect (CRSA)	This course is designed for those interested in learning how to apply Pega's Robotics capabilities to enhance their Pega applications or to help extend the life of legacy applications.
Pega Certified Data Scientist (PCDS)	This course enables the student to understand how to use the Prediction Studio, which is the platform for data scientists to predictive the predictive models that underpin Pega's 1:1 Customer Engagement.
Customised Pega Training	In addition to the courses that are based on those offered by Pega, we can also create customised training courses according to your specific needs. Please email info@Ai4Academy.com for more information.

Join the growing numbers of people achieving their Pega Certifications using Ai4Academy and kick-start your Digital Transformation career!
